

## Barrel Clamps

Barrel Clamp - Known as "Barrel Clamp", this particular hydraulic attachment is utilized on lift trucks in order to clutch objects which you would like to transport using the forklift. Typically, they are utilized in order to paper rolls, barrels, and handle kegs, together with some barrel clamp designs having the ability to revolve the load. Like for example, the revolving function permits the person operating the forklift to be able to slot in a vertically stored paper inside the horizontal intake of a printing press.
