

Aerial Work Platforms

Aerial Work Platforms - There are numerous accessories intended for lift trucks which could be used in order to help expand the functionality of your lift truck and allow you to carry things, handle materials with greater ease or to accomplish clean-up tasks.

Several of the attachments are particularly designed so as to fit on the blades themselves. Blade extensions for example, are utilized if you require more fork length, which increases lifting capacity. Blade extensions come in lengths varying from 48-120 inches. Triangular or rounded accessories are another variety utilized if transporting rolled material so as to make certain it does not roll off of the traditional flat blades.

Lifting attachments could be pivoting and telescoping crane accessories. They come in various kinds. These accessories are usually designed for moving lumber, metal bars, poles or any kind of bulky objects. Additional attachments such as other kinds of hooks and hook plates are accessible to carry items using a sling or chain. Slab lifters and magnetic filters are other things that could be used with hook attachments. Slab lifters are specialized attachments which are designed for lifting various materials that are delivered in a slab or sheet format. Carpet poles and rug rams are other lifting tools which attach to your lift truck in order to make transferring rolls of carpet a lot easier. The accessory connects onto the lift truck's forks and has a pole that goes through the middle of the carpet roll.

There are various types of forklift accessory designed for facility maintenance such as snow blades. These industrial forks can be connected to front end loaders and intended for moving materials such as mulch, snow as well as dirt. Other common cleanup attachments consist of magnetic sweepers and standard sweepers. Standard sweepers includes a broom that the forklift forks connect onto for sweeping big spaces like for example parking lots or warehouse and factory floors. The magnetic sweeper is the same except that it has a magnetic plate instead of bristles. The magnetic sweeper is used in places where there is lots of metal fragments like on shop floors for example. Sweepers have widths as much as sixty inches and this surface area makes clean up simple and fast.

Material spreaders are other accessories used on lift trucks. These spreaders are helpful for a range of applications like for instance spreading fertilizers, insecticides, seeds, ice melt, rock salt and pellets.

Another optional lifting accessory are work platforms. These could be used by several various businesses day by day. Platforms may range in size from 36" x 36" to up to 60" x 60". Several units may be available and are capable of folding up and storing into a smaller place. Work platforms are designed to raise personnel up to an overhead location making use of the forklift. Larger platform units have added space for staff in order to bring tools and other necessary stuff meant for the job. Normally work platforms are constructed of poly material or steel.
