

JLG Forklift Part

JLG Forklift Part - In the late 1960's John L. Grove, with his wife Cora embarked on a cross country journey in their RV. Recently retired, after spending many years working with his brother to build their crane business into an industry leader, John had no idea that important trip would allow JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision materials handling technologies was the end consequence of a road trip.

All through their journey, John reacquainted himself with previous business connections along the way. In combination with these conversations and a noteworthy event; two workers had been unfortunately electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John discovered a considerable market for a product that could swiftly and securely lift people in the air to accomplish upkeep and other construction services.

Upon returning from their travels, John formed a partnership with two friends and purchased a metal fabrication business in McConnellsburg, Pennsylvania. In 1970, opening operations with a crew of twenty personnel, they built and sold the first JLG aerial work platform. The business incorporates many of the simple design essentials of that original lift into current designs.

Since then, JLG Forklifts have come a long way from when Mr. John L. Grove came back from his fatefull cross-country trip and since the first JLG aerial platform entered the market. As of today, the business has extended itself into several global marketplaces and continues to develop contemporary machines to guarantee that consumers are able to become safer and more well-organized within their workplace.
